

Some people, including scientists, believe there are alternate, parallel or multiple universes that exist. This idea is also called the Strong Anthropic Principle (SAP), What are the facts?

“By faith we understand that the universe was formed at God’s command, so that what is seen was not made out of what was visible”—Hebrews 11:1 NIV

MSN News published an [article](#) on November 4, 2015 about possible new evidence of alternate or parallel universes. The article says:

“Prepare to have your mind blown.

An astrophysicist says he may have found evidence of alternate or parallel universes by looking back in time to just after the Big Bang more than 13 billion years ago.

While mapping the so-called ‘cosmic microwave background,’ which is the light left over from the early universe, scientist Ranga-Ram Chary found what he called a mysterious glow, [the International Business Times](#) reported.

Chary, a researcher at the European Space Agency's Planck Space Telescope data center at CalTech, said the glow could be due to matter from a neighboring universe 'leaking' into ours, according to [New Scientist](#) magazine.

'Our universe may simply be a region within an eternally inflating super-region,' scientist Chary wrote in a recent study in [the Astrophysical Journal](#).

'Many other regions beyond our observable universe would exist with each such region governed by a different set of physical parameters than the ones we have measured for our universe,' Chary wrote in the study.

While the findings sound promising and have already gained the attention of other astronomers, as [Russia Today \(RT\)](#) reported, it could be quite complicated to verify, since the Planck telescope provides limited data for further study.

'Unusual claims like evidence for alternate universes require a very high burden of proof,' Chary noted in the study."

This BBC article shows the lengths that some will go to try and support their ideas, and/or popular theories, including other universes, that would negate the need for a Creator/God!

"Although they claimed to be wise, they became fools." ([Romans 1:22 NIV](#))

“So where does this leave the philosophers, the scholars, and the world’s brilliant debaters? God has made the wisdom of this world look foolish.” (1 Corinthians 1:20 NLT)

All claims of multiple universes are speculative, at best, and highly imaginative. There is zero evidence of the existence of any alternate universes other than the one we’re in.
